

Solagen Winter Promotion

As part of Solagen's dedication to road safety, from January 1st 2020 until March 31st 2020, we are offering:

- 7.5% discount on orders up to £5K
- 15% discount on orders from £5K - £20K
- 20% discount on orders from £20K - £50K
- 30% discount on orders over £50K

The above discount applies to all of Solagen's standard sign packages, except Mobile (such as the 'All in one' and 'Speed Indication Device'). The Winter Promotion discounts can be offered on bespoke packages on a case by case basis.*

Extended Warranty

Solagen's standard range of products come with a 5 year warranty, and certain products can be upgraded to have a 10-year warranty package, which enables customers to double the standard warranty period.

The extended warranty covers electrical or mechanical faults, 4 site visits and a routine battery change at year 7. This option excludes mobile units and certain bespoke products.

For full details on Solagen's warranties, please speak to Solagen's Customer Service team.

Flood Sensor

Solagen's Flood Sensors work with our SAS sign range. A pole mounted sensor is positioned at a desired detection point, and triggered by detecting the presence of water for a pre-determined length of time. Once a positive detection has been made, the associated sign(s) are automatically controlled by the sensor. As every location has different considerations, Solagen will work with you, to ensure a tailored solution is provided to mitigate the hazard.

The Flood Sensor can be connected to its associated SAS signs in one of three ways: via cable, RF link, or SMS messaging. SMS messaging removes any restriction on distance between the sensor and the signs, allowing the signs to be mounted miles from the sensor if desired, so long as an SMS service is available in that location.

Please contact Solagen for more information on our sensor range.

Maintenance

Solagen have carried out a maintenance program for a number of our customers. This service can include product assessment, sign cleaning and the trimming back of obstructing foliage. A report will be provided covering the condition and any action required.

Solagen are also able to assess non-Solagen signs and produce a report on the condition of such products. Please note, Solagen would require information regarding any specialist tooling required for competitor signs.

Please note, treatment of foliage obstructions is available on a case by case basis depending on severity. For full details on Solagen's maintenance service please speak to Solagen's Customer Service team.

SAS Product range

Solagen can offer smaller Vehicle Activated Signs for slower roads or rural settings.

Our roundel speed signs can now be purchased in a 450 size, and a 300 sized sign is available as a square enclosed sign.

Please contact Solagen for more information.
